

"I had a laparoscopic hysterectomy and was back at work in one week."

It is important to find the right OB/GYN because many women have one physician from the time of their first gynecological exam through pregnancy, menopause, and beyond. We pride ourselves in being able to offer total women's care: well-woman exams, infertility, obstetrics, and menopausal issues. Several procedures that have been available only through a hospital or surgery center are now available as in-office procedures at Waco Center for Women's Health.

Explore all of the programs and services offered at Waco Center for Women's Health by calling and making an appointment today.

A mission of **compassion**. A vision of **excellence**.

For information purposes only. Photographs in this publication are not of actual patients.

Meeting the **special** healthcare needs of a woman throughout her **lifetime**

We emphasize wellness and healthy lifestyles during annual well-woman evaluations. We believe appropriate screening, along with the latest technology available, provide our patients the opportunity to reach and maintain their personal health care goals.

A full range of services are available to you:

- Well-woman exams and routine gynecology
- Routine and high-risk obstetrics
- Menopause management including custom hormone therapy
- Infertility evaluation and treatment
- Evaluation and treatment of menstrual disorders
- Sexual dysfunction management
- Endometriosis and pelvic pain disorder treatment

In addition, you'll have easy access to many specialty services such as:

- Advanced laparoscopic surgery including laparoscopic hysterectomy
- Endometrial ablation for heavy periods, which, in most cases, can be done in our office
- 4-D ultrasound

Women have new challenges and opportunities at every stage of their life. At every step, Waco Center for Women's Health strives to provide answers to your health care concerns, particularly for those complex situations that require expert diagnoses and treatments.

Waco Center for Women's Health offers a high level of comprehensive services for women of all ages and backgrounds in a comfortable, supportive environment.

Our physicians and nurse practitioners listen carefully to your concerns and provide you with information on all of your options so that you can make the most informed medical decisions.

Waco Center for Women's Health is committed to offering each patient 21st Century women's care in a personalized, private setting.

If you are planning to have a baby or have just found out you are pregnant, choosing a doctor can be one of the most important decisions you will make for your pregnancy. To give your baby a healthy start in life, visit a doctor early and throughout your entire pregnancy.

Waco Center for Women's Health delivered 1197 babies last year. From our in-office live 4D Ultrasound, fetal monitoring, to lab services, we are committed to providing state-of-the-art prenatal care.

The physicians and sonographers at Waco Center for Women's Health have acquired national recognition with the American Institute of Ultrasound Medicine. This accreditation is the hallmark of an ultrasound practice that meets nationally accepted standards of patient care.

We believe every birth is special, and are honored to share in your pregnancy and delivery. We look forward to the opportunity of helping you build your family.
